

ROHM and Suchi Semicon Establish a Strategic Semiconductor Manufacturing Partnership in India for Global and Domestic Markets

1 Mar 2026: ROHM Co., Ltd. and Suchi Semicon Pvt. Ltd. are pleased to announce the establishment of a strategic semiconductor manufacturing partnership in India.

This collaboration reflects a shared commitment to strengthening semiconductor manufacturing capabilities in India while supporting the requirements of both domestic and global markets. By combining ROHM's device technology expertise and global semiconductor leadership with Suchi Semicon's manufacturing capabilities and operational execution, the companies aim to build a reliable and scalable manufacturing framework aligned with evolving industry needs.

This partnership supports the expansion of semiconductor manufacturing capabilities in India (aligned with the "Make in India" objective) while maintaining global standards of manufacturing excellence. The collaboration aims to enhance supply chain resilience and provide customers with trusted manufacturing solutions.

Specifically, ROHM is considering the outsourcing of back-end processes for power devices and IC products to Suchi Semicon and has begun technical evaluations toward potential mass production shipments starting in 2026. Through these efforts, ROHM aims to build, in collaboration with Suchi Semicon, an early-stage manufacturing framework in India that aligns with the expected industry ramp-up in the coming years.

Furthermore, ROHM and Suchi Semicon will share a roadmap to expand the range of locally manufactured packages, thereby broadening the scope of collaboration between the two companies.

The partnership between ROHM and Suchi Semicon will extend beyond semiconductor manufacturing. Both companies recognize the growing expectations from customers across diverse sectors for locally manufactured semiconductors for the Indian market and will jointly pursue new business development opportunities to meet this demand. In addition, the collaboration will leverage Suchi Semicon's strong local marketing expertise to conduct joint marketing initiatives that enhance visibility and customer engagement. Importantly, the alliance is not limited to these areas alone; ROHM and Suchi Semicon are committed to exploring further avenues of cooperation, ensuring that the partnership evolves into a comprehensive and long-term alliance that supports the sustainable growth of India's semiconductor industry over time.

About Suchi Semicon

Suchi Semicon Pvt. Ltd. is an India-based semiconductor manufacturing company focused on building reliable and scalable back-end semiconductor manufacturing capabilities. The company is committed to supporting the growing needs of domestic and global customers by establishing high-quality manufacturing processes aligned with international standards.

With a strategic vision to contribute to India's semiconductor ecosystem, Suchi Semicon is investing in advanced infrastructure, quality systems, and operational excellence to serve automotive, industrial, consumer and energy sectors. Through structured partnerships and continuous capability development, the company aims to strengthen India's position in the global semiconductor value chain.

About ROHM

ROHM, a leading semiconductor and electronic component manufacturer, was established in 1958. From the automotive and industrial equipment markets to the consumer and communication sectors, ROHM supplies ICs, discretes, and electronic components featuring superior quality and reliability through a global sales and development network. Our strengths in the analog and power markets allow us to propose optimized solutions for entire systems that combine peripheral components (i.e. transistors, diodes, resistors) with the latest SiC power devices as well as drive ICs that maximize their performance.
